

Attachment 1. Details of Proposed Corrections

No.	Original Text	Revised Text	Page	Reason for Correction
1.	<i>"his situation underscores the urgent need for our proposed research."</i>	<i>"This situation underscores the urgent need for our proposed research."</i>	page 7, Column 1, Lines 33-35	Correction of capitalization at the beginning of the sentence due to a typographical error.
2.	<i>The initial concentration of oil and grease in the raw water for "treated" water was 2.20 mg/L, which, over 10 days, increased to 5.10 mg/L, 6.60 mg/L, 7.50 mg/L, 8.40 mg/L, and 9.00 mg/L for the control reactors A, B, C, and D, respectively (see Figure 5).</i>	<i>The initial concentration of oil and grease in the raw water for "treated" water was 2.20 mg/L, which, over 10 days, increased to 5.10 mg/L, 6.60 mg/L, 7.50 mg/L, 8.40 mg/L, and 9.00 mg/L for the control reactors A, B, C, and D, respectively (see Figure 5).</i>	page 10, Column 1, Lines 42-47	Correction of a typographical error in a technical term.
3.	<i>The numerical value in Table 2 (Variations in Raw Water and Eco-Enzyme Composition in the Experiment) for variation D reads: Raw water : Eco-enzyme = 2,750.00 : 150.00</i>	<i>The numerical value in Table 2 (Variations in Raw Water and Eco-Enzyme Composition in the Experiment) for variation D is corrected to: Raw water : Eco-enzyme = 2,750.00 : 250.00</i>	page 8, Column 1, Line 10	Based on the raw research data, the treatment composition of variation D used throughout the experiment was Raw water : Eco-enzyme = 2,750.00 : 250.00. The entire process of data analysis, interpretation of results, and discussion was based on this composition. The error occurred only in the preparation of Table 2 during the final manuscript formatting stage.
